During the 90s Le Tone had a major hit, "Joli Dragon", and devoted himself to music for 15 years before progressively moving towards illustrative art. Since 2011 his creations have been exhibited in famous places such as the Pompidou centre. An admirer of artists who know how to make the best use of colour, Le Tone confesses to having a weakness for black and white, which he uses to tell simple stories by using felt pen drawings in notebooks.

1974

Citroën launches CX. It's the ultimate mix of technical innovation and advanced design with the engine and gearbox positioned together at the front. Sophisticated hydropneumatic suspension, concave rear screen and a futuristic dashboard help it to succeed amongst more ordinary rivals.

2019

The spectacular design of the 100% electric 19_19 Concept is inspired by aeronautics and pushes comfort to the extreme, with a lounge on-the-move experience created by intelligent suspension. It also provides autonomous driving, a personal assistant and a range of 500 miles.

1934

Citroën revolutionises the automotive landscape with Traction Avant. The famous name relates to its ground breaking front wheel drive engineering.

1939

Citroën launches 'TUB', a supremely practical modern design with a sliding side door: its successor is the famous Type H, above, launched in 1948.

1948

The much-loved 2 CV is created as a "safe and economical vehicle, able to carry 4 people on-board and 50 kg of luggage". More than 5 million are made.

1955

Unveiled to a stunned public at the 1955 Paris Motor Show, DS takes futuristic design to new heights. Its stunning aerodynamic shape, created by Flaminio Bertone, earns it the nickname 'flying saucer'. Under the skin it's just as advanced.

1968

It's a golden age for light and agile vehicles like Ami 6, Dyane and Mehari, a unique design for all roads and multi-purpose use.

1970

The modern looks and neat style of GS will see it remain one of the most aerodynamic and comfortable vehicles on the market for years to come. Equipped with a flat 4-cylinder engine and hydropneumatic suspension, this hatchback will go on to sell around 2.5 million units.

ELEGANT AND AERODYNAMIC

New Citroën C4 and New Citroën e-C4 100% electric harmoniously combine the smooth and refined lines of a hatchback with the generous space and strength of an SUV. This, along with the inclined roof line, gives them an aerodynamic profile that's unique in their category. This sense of purpose is enhanced by large diameter wheels and a raised posture as if ready to pounce.

A FRESH AESTHETIC APPROACH

The unique character of New Citroën C4 and New Citroën e-C4 100% electric is based on the brand's new identity, which was launched at the beginning of 2020. This is expressed particularly by the modern and technological front end, which has 100% LED two-tier lighting and chevrons spanning the entire width of the car. This dynamism and strength is continued at the rear end, where its rear lights are connected by a gloss black finisher.

INTERIOR AMBIENCES

Modernity and wellbeing combine onboard New Citroën C4 and New Citroën ë-C4 100% electric. New motifs are featured on the seats, whilst satin chrome or gloss black touches complement warm and soft materials throughout. With the subtle, welcoming tones of the Urban Grey or Hype Black interior ambiances, you'll feel at home from the moment you open the door.

The **Urban Grey** ambience combines the comfort and discretion of the padded grey Chevrons cloth, with a black leather-effect textile and a grey cloth band with screen-printed-chevrons graphic motif.

The **Hype Black** ambience offers the distinction of padded black grain leather, combined with a black leather-effect textile and a grey cloth band with screen-printed-chevrons graphic motif.

COMFORT

Contemporary and welcoming, New Citroën ë-C4 100% electric and C4's interior has been designed to ensure serenity reigns supreme. The CITROËN ADVANCED COMFORT® programme delivers innovative, technological and intelligent solutions to create wellbeing for drivers and passengers alike, and confirm Citroën's driving-comfort credentials. Four main themes are at the heart of this comfort engineering: the cocoon effect, practicality, fluidity and peace of mind.

ADVANCED COMFORT SEATS

Another exclusive Citroën innovation are the Advanced Comfort seats of New Citroën ë-C4 100% electric and Citroën C4. These provide comfort in many different ways; visual comfort thanks to visible padding; welcoming comfort with immediate softness and support; dynamic comfort from high-density foam at the heart of the seats which avoids any sagging over time; and finally, comfort in posture through the lumbar and height adjustment of the front seats – complemented by the wide side and central armrests on both the front and rear seats. In addition to integrated heating, dependent on version or interior ambience, the front seats can also be fitted with a massage system which gives an onboard feeling of being in a cocoon of comfort.

EXCEPTIONAL INTERIOR SPACE

With their wheelbase of 2,670 mm, one of the longest in their category, New Citroën ë-C4 100% electric and Citroën C4 provide a generous passenger compartment, with rear passengers benefiting from impressive legroom of 198 mm. Thanks to their width, both can accommodate three people in the rear without compromising on comfort.

CLEVER AND ERGONOMIC EQUIPMENT

Designed in accordance with the Citroën Advanced Comfort® programme, New Citroën ë-C4 100% electric and New Citroën C4 bring innovation to the onboard equipment. The front passenger can enjoy the Citroën Smart Pad Support™, a clever retractable support system built into the dashboard which lets them secure their tablet in complete safety. The centre console contains a built-in magnetic-induction charging mat for smartphones and all devices compatible with the Qi standard. Four type A and C USB sockets are also fitted, two at the front and two at the rear of the centre console.

Standard, optional or not available dependent on version.

REAL DRIVING PLEASURE

Continuing the brand's heritage, New Citroën ë-C4 100% electric and New Citroën C4 excel when it comes to their driving experience. Refined interior acoustics courtesy of reduced road noise and the insulated engine compartment are supplemented by soothing lighting for all passengers: the electric glass sunroof* and the glazed surfaces let light flood into the entire passenger compartment. With dual-zone automatic air conditioning and even a heated steering wheel on selected versions, these cars provide

temperature-related comfort in all conditions. In addition, New ë-C4 100% electric provides ë-Comfort class mobility, with a total absence of vibrations, zero noise and instantly available torque, with responsive fluidity providing an unrivalled driving sensation. And thanks to temperature pre-conditioning, regardless of the season, you get into your vehicle at the set temperature of 21°C.

* Optional dependent on version chosen.

CONNECTED NAVIGATION

CITROËN CONNECT NAV

For seamless continuity between the digital world and the car, New Citroën ë-C4 100% electric and New Citroën C4 are fitted with a 10" touchscreen featuring voice activation. As the nerve centre of the car, you can use this to access the very latest generation Citroën Connect Nav 3D navigation system. Combined with connected services such as TomTom Traffic, it provides information on real-time traffic, indicates danger zones and shows the locations and prices of fuel stations and car parks. Additionally the system

provides weather information and can search for local points of interest. The system is configured to display a range of information relating to the electrification of the vehicle, in particular showing electric charging areas in addition to fuel stations. It also gives an indication of the car's operating scope according to the battery's charge level, helping to manage the range of New Citroën ë-C4 100% electric as effectively as possible.

CONNECTIVITY TECHNOLOGY

CITROËN CONNECT PLAY

This technology, which includes the Mirror Screen function (compatible with Android Auto and Apple CarPlay™), reproduces your smartphone's apps on the car's touchscreen, letting you use them safely. When it comes to charging, New Citroën ë-C4 100% électrique and New Citroën C4 have up to four USB sockets, which means that everyone onboard can charge their smartphone. There's also a charging mat built into the centre console to charge a smartphone via induction.*

CITROËN CONNECT ASSIST

This geolocated emergency and assistance calls service sends the appropriate help to your location, either automatically or on a press of the emergency assistance button. This service is available 24 hours a day, seven days a week, free of charge and without subscription. This also includes the system for remotely managing your vehicle using the My Citroën app.

* Dependent on version.

AUTOMATIC GEAR- BOX

New Citroën ë-C4 100% electric and Citroën C4 feature a new automatic gearbox control with an elegant guilloché metal design. It has three easily-selected positions: reverse (R), neutral (N) or forward drive (D). It's also linked to two backlit buttons: P to activate park mode, and M to activate manual driving mode on petrol or diesel versions, or B to activate brake mode and recover more power for the battery on the electric version.

100%
ELECTRIC MOTOR

The electric motor of New Citroën ë-C4 100% electric has power of 100 kW (136 hp) and torque of 260 Nm, which is available instantly for 0-62 mph (0-100 km/h) in 9.7 seconds in Sport mode. The battery of the electric motor has a capacity of 50 kWh and is guaranteed for eight years or 100,000 miles for 70% of its charging capacity. New Citroën ë-C4 100% electric has an added Brake mode, which amplifies deceleration without pressing the brake pedal, whilst recovering energy. This helps to give it a range of up to 217 miles (WLTP combined cycle).

A green Citroën ë-C4 100% electric car is driving on a city street. The car is in motion, and the background is blurred. The license plate reads VM-159-CM.

EASE OF CHARGING

Home Mode
(White LED)

Charging Mode
in Progress
(Flashing green LED)

Charge Complete Mode
(Constant green LED)

Deferred Charge Mode
(Flashing blue LED)

One of the signature characteristics of New Citroën ë-C4 100% électric is its great ease of use. By using the touchscreen or the My Citroën app, charging can be deferred to take advantage of off-peak tariffs, for example. Another is the indicator lamp on the charging flap which lets you monitor the charging process, something which can also be done using the My Citroën app.

DIFFERENT TYPES OF CHARGING

In town, on motorways or at home, there are many different ways to charge New Citroën ë-C4 100% electric, which means a suitable solution is always easy to find. The choice is yours.

DOMESTIC SOCKET

62 MILES (100 KM) IN 9 HOURS

At home or for ad-hoc requirements, a domestic socket charges the battery to 100% in 28 hours with the optional three-pin charging cable.

ACCELERATED CHARGING

A home charging point or “wall box” terminal can be installed at your home to provide charging from 0% to 100% in 7.5 hours with a single-phase supply, and in just 5 hours with a three-phase supply with the optional 11 kW charger. You can also find 7 kW or 11 kW terminals in town and on public roads.

PUBLIC RAPID CHARGING

On a 20 kW public terminal, the battery charges at the rate of 87 miles in 1 hour. And on those with a power of 100 kW, which are found on motorways, 80% of the battery is charged in just 30 minutes.

If you don't already have a charging point at home, your Citroën retailer can introduce you to Pod Point, our home charging partner. Pod Point supply and install accelerated home charging points (wall boxes) that allow you to charge your New ë-C4 fully in 7 1/2 hours (based on a 7 kW charging point).

New ë-C4 is an eligible vehicle for the UK Government Plug In Car Grant and Electric Vehicle Homecharge Scheme, as well as the Workplace Charging Scheme. Ask your Citroën retailer for more information.

INTUITIVE INTERFACES

New Citroën ë-C4 100% electric has several intuitive interfaces, which are easy to read and use. The dedicated display mode on the digital instrument panel shows the battery level gauge or the range, and gives you access to three key pieces of information: the power indicator, the energy flow and the temperature-related comfort.

Tabs on the 10" touch screen in the centre of the dashboard display the operating status of the system, the settings for the deferred charging of the battery and the temperature pre-conditioning of the passenger compartment. When the car is charging, the screen displays relevant information such as the remaining time for a complete charge, the range recovered (in miles) and the battery charge rate recovered.

Instrument panel including the essential information relating to the electrical system

Statistics: to view the recent vehicle's electrical consumption and help optimise your driving style to maximise range

Energy flow: to view the operation of the electric drivetrain

- 9 ONLINE QUOTATION AND APPOINTMENT - RESERVE YOUR APPOINTMENT AND CALCULATE YOUR AFTERSALES SERVICES
- 10 YOUR CAR IS CLEANED ON BEFORE COLLECTION

TOWARDS THE AUTONOMOUS CAR

The Highway Driver Assist semi-autonomous driving system combines the adaptive cruise control (with Stop & Go function) with a system that keeps the vehicle in its lane. This means the driver no longer needs to manage the speed or the trajectory on multi-lane roads as these are controlled by the car. Note that for this to remain active, the driver's hands must remain on the steering wheel. The Colour Heads-Up Display helps the driver to keep their eyes on the road while still having key driving information within your field of vision.

20 SAFETY AND DRIVING AID SYSTEMS

									
⌵ CAN BE DEACTIVATED	⌵ CAN BE DEACTIVATED	⌵ CAN BE DEACTIVATED	⌵ CAN BE DEACTIVATED	⌵ CAN BE DEACTIVATED	⌵ CAN BE DEACTIVATED	⌵ CAN BE DEACTIVATED	⌵ CAN BE DEACTIVATED	⌵ CAN BE DEACTIVATED	⌵ CAN BE DEACTIVATED
<p>COLOUR HEAD-UP DISPLAY</p> <p>Using a transparent panel to display key driving information (current and recommended speed, cruise control or speed limiter setting, navigation guidance and collision risk alert) within the driver's field of vision, the Colour Head-Up Display helps the driver to keep their eyes on the road.</p>	<p>ADAPTIVE CRUISE CONTROL WITH STOP & GO FUNCTION</p> <p>Using a camera and a radar, the system detects the car in front and automatically maintains the safe distance chosen by the driver by applying the brake and the accelerator, until the vehicle comes to a complete stop. The vehicle can also move off again without any action taken by the driver. Available on selected versions fitted with an automatic gearbox.</p>	<p>HIGHWAY DRIVER ASSIST</p> <p>This technology allows the driver to delegate some of the driving to the car itself. The system maintains the position of the vehicle in its lane and manages stopping and moving off again in relation to the car in front. Standard or optional on selected versions fitted with an automatic gearbox.</p>	<p>ACTIVE SAFETY BRAKE</p> <p>This emergency braking system reduces the risk of collisions. It works from speeds of 3 mph with fixed or moving objects and with pedestrians. If a risk of collision is detected, the system alerts the driver. If the driver does not react, the system brakes automatically.</p>	<p>COLLISION RISK ALERT AND POST-COLLISION SAFETY BRAKE</p> <p>The systems warns the driver if there is a risk of a collision with the vehicle in front at speeds from 19 mph. This happens just before automatic braking is triggered. After a collision, the brakes are activated automatically to immobilise the vehicle and avoid a follow-on accident.</p>	<p>DRIVER ATTENTION WARNING</p> <p>This system assesses the attention levels of the driver by monitoring the car's trajectory in relation to lane markings. This function is particularly suited to fast roads, at over 40 mph.</p>	<p>ACTIVE LANE DEPARTURE WARNING SYSTEM</p> <p>This system uses a camera which recognises solid and broken lines on the road. If the line is approached without the indicators being activated, the steering will gradually counter-steer to keep the vehicle in its initial lane. This helps to combat a lack of alertness on the part of the driver.</p>	<p>BLIND SPOT MONITORING SYSTEM</p> <p>This monitoring system is very useful on roads with more than one lane, as it notifies the driver that there is a vehicle in the blind spots using an orange LED located in the corner of the door mirrors.</p>	<p>AUTOMATIC HEADLAMP DIPPING</p> <p>Depending on the traffic, the Intelligent Beam Headlights system automatically switches between main and dipped beams when vehicles are detected approaching from the opposite direction or overtaking. It provides optimum lighting when driving at night.</p>	<p>EXTENDED ROAD SIGN RECOGNITION AND SPEED RECOMMENDATION</p> <p>This system informs the driver of the current speed limit. When the camera detects a speed limit sign, the driver can accept the recommended speed and make it their cruise control or speed limiter speed setting. "Stop", "No Entry" and "No Overtaking" signs are also detected.</p>

20 SAFETY AND DRIVING AID SYSTEMS

									
⌵ CAN BE DEACTIVATED	⌵ CAN BE DEACTIVATED	⌵ CAN BE DEACTIVATED							
PARK ASSIST This is an active parking assistance system, used for parallel or bay parking. When requested by the driver, it automatically detects a space, then controls the steering to park in complete safety. The driver only needs to engage reverse gear, accelerate and brake.	LATERAL PARKING SENSORS This system lets the driver know how close obstacles are to the sides of the car when manoeuvring. It uses information from the sensors on the front and rear bumpers, combined with the trajectory of the vehicle.	COFFEE BREAK ALERT This system informs the driver when it is time to take a break, i.e. after a total of two hours of driving at over 40 mph.	PROXIMITY KEYLESS ENTRY AND START This system allows you to lock, unlock and start your vehicle while keeping the key in your pocket or bag. The vehicle recognises its driver when they approach.	ELECTRIC PARKING BRAKE The Electric Parking Brake is applied automatically when the engine is switched off and is released when the vehicle moves off. This brake can also be applied and released manually, by operating the control lever.	360 VISION This function makes manoeuvres easier by using the touchscreen to display a view from above the car and of its 360° surroundings. It offers three different views and selects the most suitable one for the manoeuvre in progress. The desired view can also be chosen manually.	REVERSING CAMERA WITH TOP REAR VISION When reverse gear is engaged, the camera provides the view behind the vehicle on the touchscreen, enhanced with coloured lines, as well as a reconstructed 180° image of its rear surroundings. When approaching an obstacle, the camera zooms in automatically.	TRAILER STABILITY CONTROL On all vehicles fitted with a towing device, this additional function of the ESP detects swaying movements of a trailer and acts on the vehicle's braking system to stabilise it. <i>(Not available on Citroën ë-C4.)</i>	HILL START ASSIST This system prevents any unwanted movement of the vehicle on a slope when the brake pedal is released. Hill Start Assist operates on gradients of more than 3% by stabilising the vehicle for approximately two seconds. The driver can therefore calmly move from the brake pedal to the accelerator pedal.	STATIC INTERSECTION LIGHTING This provides an additional beam of light on the inside of the bend to increase visibility and safety on bends and at junctions.

BlueHDi 130 S&S EAT8 automatic - Shine & Shine Plus	5.5 - 5.1 (51.4 - 55.7)	4.7 - 4.3 (60.7 - 65.3)	4.1 - 3.8 (69.0 - 75.0)	5.2 - 4.7 (54.5 - 60.2)	4.8 - 4.4 (59.1 - 64.5)	120 - 125

⁽¹⁾ Figures shown are for comparison purposes and should only be compared to the range values of other cars tested to the same technical standard. The range achieved in real world conditions will depend upon a number of factors: (including but not limited to) the accessories fitted (pre and post registration), variations in weather, driving styles and vehicle load. The WLTP (Worldwide Harmonised Light Vehicles Test Procedure) is used to measure fuel consumption (and zero emissions range) and CO₂ figures. These CO₂ figures are used to calculate the Vehicle Excise Duty (VED) for the first registration of the vehicle. The CO₂ figures display a range to reflect the highest value for the highest emitting version with all available options added, through to a minimum value to represent the lowest emitting version in standard specification.

WHEELS AND WHEEL TRIMS

18" AEROBLADE DIAMOND-CUT ALLOY WHEELS

18" AEROBLADE DARK ALLOY WHEELS

18" CROSSLIGHT DIAMOND-CUT ALLOY WHEELS*

* Only available on Citroën ë-C4.

DIMENSIONS

Values in millimetres.
(1) Mirrors folded. (2) Overall. (3) Electric versions.

With the added reassurance of a warranty, routine servicing and maintenance, as well as 24-hour roadside assistance, you are protected.

- **CITROËN WARRANTY**
Every new Citroën car has the benefit of a 3 year* warranty package, plus a 12 year anti-perforation** warranty and a 3 year paint warranty.

- **CITROËN ASSISTANCE**
Citroën Assistance brings rapid expert roadside assistance to you in an emergency in response to a telephone call. It comes free of charge for a full year and operates 24 hours a day in all parts of the UK and Europe. Services include nationwide recovery for both car and passengers, a home call service, replacement vehicle, hotel accommodation and vehicle storage if required. Please note, Citroën Assistance only applies to incidents covered by the new vehicle warranty, and excludes non-vehicle faults, such as running out of fuel, misfuelling, loss of keys, lock-ins, road traffic accidents and punctures/wheel changes. For more details, please contact Citroën at <https://www.citroen.co.uk/owner-services/emergency-assistance>

* 2 years' unlimited warranty. No-fee customer option of 1 year's Dealer provided warranty, only on cars sourced from Citroën UK Limited. Note: Dealer provided warranty is limited to 60,000 miles for cars.
** Against all internal to external perforation to bodywork or underbody.

- **CITROËN MAINTENANCE**
From roadside assistance to replacing wear and tear parts or regular servicing, with Citroën Maintenance you have total peace of mind. For a one-off fee or low monthly payment, our experienced engineers will take care of your Citroën, whatever happens. To find out more, contact your Citroën Dealer or Citroën Authorised Repairer.

- **CITROËN SERVICING**
Available up to 1 year from your vehicle's registration date, but before its first chargeable service, a Citroën Servicing Package enables you to pay in advance for your vehicle's servicing needs for 3 years/35,000 miles. For further information, please contact your Citroën Dealer.

- **CITROËN MOT TEST**
Once your vehicle is three years old, it requires an annual MOT Test. This is a legal requirement to check that it meets road safety and environmental standards. Our nationwide network of Citroën Authorised Repairers know your Citroën best, so if your vehicle's MOT Test is due, why not contact your local Citroën dealer? You can be confident that your vehicle will be looked after by one of our expert trained Citroën Technicians, nominated by DVSA as accredited MOT Testers. Plus, whilst your vehicle is with us, we'll carry out a free manufacturer diagnostic test, check for any new technical updates and carry them out for free - that's the advantage of getting your test done by the people who really know your Citroën.

DOWNLOAD THE MYCITROËN APP
on your smartphone and benefit from information and services personalised to your Citroën vehicle.

DOWNLOAD THE SCAN MY CITROËN MOBILE APP
Get all the vital information at your fingertips. Scan features and components and access details of the exact new Citroën that you're interested in.

RATE, SUBMIT AND SHARE YOUR OPINION ABOUT YOUR VEHICLE
or in a Citroën Dealership when purchasing or servicing your vehicle. Ratings and reviews are published on the Citroën's website.

BP PULSE
We've partnered with bp pulse, the largest public charge network in the UK, to offer Citroën customers buying a brand new ë-C4 a 6 month free subscription to bp pulse. This offers access to a wide range of public charging points, many of which do not incur any extra charge for electricity used.

Citroën prefers Total – Note: Images and specification descriptions are dependent on trim level and options specified. Every endeavour has been made to ensure that the information and details contained in this brochure were accurate at the time of going to press. However the company reserves the right, whilst preserving the essential characteristics of the models described, to introduce at any time modifications, changes of details, equipment or accessories. Every effort will be made to bring this brochure up to date, but in order to avoid any misunderstanding please consult your Dealer. Insurance groups (1-50) are an indication only, please consult your insurance company for further details.

CO₂ figures, P11D values, BIK% and MRRP pricing shown above are for a standard vehicle without any additional optional equipment. CO₂ figures are used to calculate Vehicle Excise Duty (VED) for the first registration of the vehicle and BIK%. The addition of optional extras could increase the certified CO₂ emission output. This in turn may affect the amount of VED payable upon registration, and, for company car drivers, the amount of Benefit in Kind (BIK) tax payable.

For further information on CO₂ and pricing for vehicles with optional equipment, please visit <https://www.citroen.co.uk/configurator.html>

+ Figures shown are for comparison purposes and should only be compared to the fuel consumption and CO₂ values of other cars tested to the same technical standard. The fuel consumption achieved, and CO₂ produced, in real world conditions will depend upon a number of factors including, but not limited to: the accessories fitted (pre and post registration); variations in weather; driving styles and vehicle load.

The WLTP (Worldwide Harmonised Light Vehicles Test Procedure) is used to measure fuel consumption and CO₂ figures.

* 'On the Road' MRRP includes registration plates and delivery to dealer (including VAT), 12 months' Vehicle Excise Duty and new vehicle registration fee of £55. Excludes fuel and insurance.

All information and prices correct at time of publication, but are subject to change at any time without prior notice (which may occur as a result of, but not limited to, any changes in legislation and/or any changes by the Government). Please see our Prices and Specifications brochures or contact your local Citroën dealer for the most up-to-date prices and specification details for all models.

1 Subject to subscription – please visit <https://services-store.citroen.co.uk/> to subscribe.

2 Offers faster charging only where three-phase power is available. We do not recommend this option unless you intend to charge your Ë-C4 primarily from a source connected to three-phase power (unlikely if a home charge point). Using this charger in conjunction with a single-phase power source will actually charge your vehicle more slowly than the standard 7 kW single-phase onboard charger.

	Sense	Sense Plus	C-Series Edition	Shine Plus
Technology and driver assistance				
City Park Pack (adds Park Assist and 360 Vision)			£350	£350

CO₂ emissions¹ (g/km)	122 - 136	122 - 135	119 - 128	131 - 142	130 - 139	129 - 134

1 Figures shown are for comparison purposes and should only be compared to the fuel consumption and CO₂ values of other cars tested to the same technical standard. The fuel consumption achieved, and CO₂ produced, in real world conditions will depend upon a number of factors: (including but not limited to) the accessories fitted (pre and post registration), variations in weather, driving styles and vehicle load. The WLTP (Worldwide Harmonised Light Vehicles Test Procedure) is used to measure fuel consumption and CO₂ figures. These CO₂ figures are used to calculate the Vehicle Excise Duty (VED) for the first registration of the vehicle. The CO₂ figures display a range to reflect the highest value for the highest emitting version with all available options added, through to a minimum value to represent the lowest emitting version in standard specification.

CITROËN ë-C4 ELECTRIC

Models produced from 01 January 2023

Technical

Battery Electric Vehicle 100 kW	
Electric Motor	
Motor power	100 kW / 136 hp
Max torque (Nm @ RPM)	300 @ 3674
Operating voltage (V)	400
Traction battery	
Battery capacity (kWh)	50
Traction battery warranty	8 years / 100,000 miles for 70% capacity
Onboard charger	7.4 kW single phase (11 kW three-phase optional)
Charging port	Combined CCS / Type 2
Estimated charging times	
Rapid charge to 80% on 100 kW DC charger via CCS	30 minutes
Accelerated charge via 32 A wallbox - single phase AC	7 hours 30 minutes
Slow charge via domestic 13A socket - single phase AC	> 24 hours
Transmission type	Single speed automatic transmission with Brake Mode
Performance (All figures driver alone)	
Max speed (mph)	93
0-62mph (secs)	10.0
Standing 1000m (secs)	32.2
Range (miles)	
Combined	219 - 220
CO ₂ emissions At tailpipe (g/km) - WLTP - standard versions	0

Battery Electric Vehicle 100 kW	
Weights (kg)	
Kerb Weight	1561
Mass in service	1675
Gross vehicle weight	2020
Max towing weight braked/unbraked	n/a
Brakes	Ventilated front discs. Rear discs
Steering	
Turning circle between kerbs (m)	10.9
Exterior dimensions (mm)	
Length	4360
Width (excluding mirrors)	1800
Height	1520
Wheelbase	2670
Boot volumes & dimensions	
Seats up - below parcel shelf max (litres VDA)	380
Max with seats folded	1250

The range and electric consumption figures mentioned comply with the WLTP test procedure, on the basis of which new vehicles are type approved from 1 September 2018. They may vary depending on actual conditions of use and on different factors such as : speed, thermal comfort on board the vehicle, driving style and outside temperature. The charging time depends in particular on the power of the charger on board the vehicle, the charging cable and the type and power of the charging station used.
