

During the 90s Le Tone had a major hit, "Joli Dragon", and devoted himself to music for 15 years before progressively moving towards illustrative art. Since 2011 his creations have been exhibited in famous places such as the Pompidou

centre. An admirer of artists who know how to make the best use of colour, Le Tone confesses to having a weakness for black and white, which he uses to tell simple stories by using felt pen drawings in notebooks.

1974

Citroën launches CX. It's the ultimate mix of technical innovation and advanced design with the engine and gearbox positioned together at the front. Sophisticated hydropneumatic suspension, concave rear screen and a futuristic dashboard help it to succeed amongst more ordinary rivals.

2019

The spectacular design of the 100% electric 19_19 Concept is inspired by aeronautics and pushes comfort to the extreme, with a lounge on-the-move experience created by intelligent suspension. It also provides autonomous driving, a personal assistant and a range of 500 miles.

1934

Citroën revolutionises the automotive landscape with Traction Avant. The famous name relates to its ground breaking front wheel drive engineering. 1939

Citroën launches 'TUB', a supremely practical modern design with a sliding side door: its successor is the famous Type H, above, launched in 1948.

1948

The much-loved 2 CV is created as a "safe and economical vehicle, able to carry 4 people on-board and 50 kg of luggage". More than 5 million are made.

1955

Unveiled to a stunned public at the 1955 Paris Motor Show, DS takes futuristic design to new heights. Its stunning aerodynamic shape, created by Flaminio Bertone, earns it the nickname 'flying saucer'. Under the skin it's just as advanced. 1968

It's a golden age for light and agile vehicles like Ami 6, Dyane and Mehari, a unique design for all roads and multi-purpose use.

1970

The modern looks and neat style of GS will see it remain one of the most aerodynamic and comfortable vehicles on the market for years to come. Equipped with a flat 4-cylinder engine and hydropneumatic suspension, this hatchback will go on to sell around 2.5 million units.

THERE'S **A CITROËN FOR EVERYONE**

In town or on the open road, enjoy comfort and a sense of wellbeing onboard. These are the values that have always driven Citroën.

STORAGE COMPARTMENTS FOR EVERYONE

The generous 380 L boot is easily accessible thanks to its low, flat-loading sill and is flexible enough to meet every need. Its two-position floor optimises the space available and, when the rear bench seat is folded, provides a flat floor to accommodate bulky objects. The charging cable can be found under this floor. On board New Citroën ë-C4 100% ëlectric and New Citroën C4, you'll find numerous practical storage compartments including a sliding drawer on the dashboard in front of the passenger which is ideal for storing a tablet whilst keeping the glove box free. For the rear passengers, cup holders and a storage space have been built into the retractable armrest of the rear middle seat.*

EASE OF CHARGING

Home Mode (White LED)

Charging Mode in Progress (Flashing green LED)

Charge Complete Mode (Constant green LED)

Deferred Charge Mode (Flashing blue LED)

One of the signature characteristics of New Citroën ë-C4 100% ëlectric is its great ease of use. By using the touchscreen or the My Citroën app, charging can be deferred to take advantage of off-peak tariffs, for example. Another is the indicator lamp on the charging flap which lets you monitor the charging process, something which can also be done using the My Citroën app.

46 **TECHNOLOGY**

TEST DRIVE

CONFIGURE

DOMESTIC SOCKET

62 MILES (100 KM) **IN 9 HOURS**

At home or for ad-hoc requirements, a domestic socket charges the battery to 100% in 28 hours with the optional three-pin charging cable.

PUBLIC RAPID CHARGING

On a 20 kW public terminal, the battery charges at the rate of 87 miles in 1 hour. And on those with a power of 100 kW, which are found on motorways, 80% of the battery is charged in just 30 minutes.

ACCELERATED CHARGING

A home charging point or "wall box" terminal can be installed at your home to provide charging from 0% to 100% in 7.5 hours with a single-phase supply, and in just 5 hours with a three-phase supply with the optional 11 kW charger. You can also find 7 kW or 11 kW terminals in town and on public roads.

If you don't already have a charging point at home, your Citroën retailer can introduce you to Pod Point, our home charging partner. Pod Point supply and install accelerated home charging points (wall boxes) that allow you to charge your New ë-C4 fully in 7 1/2 hours (based on a 7 kW charging point).

New ë-C4 is an eligible vehicle for the UK Government Plug In Car Grant and Electric Vehicle Homecharge Scheme, as well as the Workplace Charging Scheme. Ask your Citroën retailer for more information.

20 SAFETY

AND DRIVING AID SYSTEMS

COLOUR **HEAD-UP DISPLAY**

Using a transparent panel to display key driving information (current and recommended speed, cruise control or speed limiter setting, navigation quidance and collision risk alert) within the driver's field of vision, the Colour Head-Up Display helps the driver to keep their eyes on the road

ADAPTIVE CRUISE **CONTROL WITH** STOP & GO **FUNCTION**

Using a camera and a radar, the system detects the car in front and automatically maintains the safe distance chosen by the driver by applying the brake and the accelerator, until the vehicle comes to a complete stop. The vehicle can also move off again without any action taken by the driver. Available on selected versions fitted with an automatic gearbox.

HIGHWAY DRIVER ASSIST

This technology allows the driver to delegate some of the driving to the car itself. The system maintains the position of the vehicle in its lane and manages stopping and moving off again in relation to the car in front. Standard or optional on selected versions fitted with an automatic gearbox.

ACTIVE **SAFETY BRAKE**

This emergency braking system reduces the risk of collisions. It works from speeds of 3 mph with fixed or moving objects and with pedestrians. If a risk of collision is detected, the system alerts the driver. If the driver does not react, the system brakes automatically.

SAFETY BRAKE The systems warns the driver if there is a risk of a collision with the vehicle in front at speeds from 19 mph. This happens just before automatic braking is triggered. After a collision, the brakes are activated automatically to immobilise the vehicle and avoid a follow-on accident.

COLLISION RISK

POST-COLLISION

ALERT AND

DRIVER ATTENTION WARNING

This system assesses the attention levels of the driver by monitoring the car's trajectory in relation to lane markings. This function is particularly suited to fast roads, at over 40 mph.

ACTIVE LANE DEPARTURE **WARNING**

SYSTEM

This system uses a camera which recognises solid and broken lines on the road. If the line is approached without the indicators being activated, the steering will gradually countersteer to keep the vehicle in its initial lane. This helps to combat a lack of alertness on

the part of the driver.

BLIND SPOT MONITORING SYSTEM

This monitoring system is very useful on roads with more than one lane, as it notifies the driver that there is a vehicle in the blind spots using an orange LED located in the corner of the door mirrors.

AUTOMATIC HEADLAMP DIPPING

Depending on the traffic, the Intelligent Beam Headlights system automatically switches between main and dipped beams when vehicles are detected approaching from the opposite direction or overtaking. It provides optimum lighting when driving at night.

EXTENDED ROAD SIGN RECOGNITION **AND SPEED RECOMMENDATION**

This system informs the driver of the current speed limit. When the camera detects a speed limit sign, the driver can accept the recommended speed and make it their cruise control or speed limiter speed setting. "Stop", "No Entry" and "No Overtaking" signs are also detected.

57 56 TECHNOLOGY

ORDER ONLINE

20 SAFETY **AND DRIVING AID SYSTEMS**

PARK ASSIST

This is an active parking assistance system, used for parallel or bay parking. When requested by the driver, it automatically detects a space, then controls the steering to park in complete safety. The driver only needs to engage reverse gear, accelerate and brake.

LATERAL **PARKING SENSORS**

This system lets the driver know how close obstacles are to the sides of the car when manoeuvring. It uses information from the sensors on the front and rear bumpers, combined with the trajectory of the vehicle.

COFFEE BREAK ALERT

This system informs the driver when it is time to take a break. i.e. after a total of two hours of driving at over 40 mph.

PROXIMITY KEYLESS ENTRY AND START

This system allows you to lock, unlock and start your vehicle while keeping the key in your pocket or bag. The vehicle recognises its driver when they approach.

ELECTRIC PARKING BRAKE

The Electric Parking Brake is applied automatically when the engine is switched off and is released when the vehicle moves off. This brake can also be applied and released manually, by operating the control lever.

360 VISION

This function makes manoeuvres easier by using the touchscreen to display a view from above the car and of its 360° surroundings. It offers three different views and selects the most suitable one for the manoeuvre in progress. The desired view can also be chosen manually.

REVERSING CAMERA WITH TOP REAR VISION

When reverse gear is engaged, the camera provides the view behind the vehicle on the touchscreen, enhanced with coloured lines, as well as a reconstructed 180° image of its rear surroundings. When approaching an obstacle, the camera zooms in automatically.

TRAILER STABILITY CONTROL

On all vehicles fitted with a towing device, this additional function of the ESP detects swaying movements of a trailer and acts on the vehicle's braking system to stabilise it.

(Not available on Citroën ë-C4.)

CONFIGURE

HILL START **ASSIST**

This system prevents any unwanted movement of the vehicle on a slope when the brake pedal is released. Hill Start Assist operates on gradients of more than 3% by stabilising the vehicle for approximately two seconds. The driver can therefore calmly move from the brake pedal to the accelerator pedal.

STATIC INTERSECTION LIGHTING

This provides an additional beam of light on the inside of the bend to increases visibility and safety on bends and at iunctions.

DIMENSIONS

[1] Figures shown are for comparison purposes and should only be compared to the range values of other cars tested to the same technical standard. The range achieved in real world conditions will depend upon a number of factors: (including but not limited to) the accessories fitted (pre and post registration), variations in weather, driving styles and vehicle load. The WLTP (Worldwide Harmonised Light Vehicles Test Procedure) is used to measure fuel consumption (and zero emissions range) and CO_2 figures. These CO_2 figures are used to calculate the Vehicle Excise Duty (VED) for the first registration of the vehicle. The CO_2 figures display a range to reflect the highest value for the highest emitting version with all available options added, through to a minimum value to represent the lowest emitting version in standard specification.

With the added reassurance of a warranty, routine servicing and maintenance, as well as 24-hour roadside assistance, you are protected.

Every new Citroën car has the benefit of a 3 year* warranty package, plus a 12 year anti-perforation** warranty and a 3 year paint warranty.

WARRANTY

Citroën Assistance brings rapid expert roadside assistance to you in an emergency in response to a telephone call. It comes free of charge for a full year and operates 24 hours a day in all parts of the UK and Europe. Services include nationwide recovery for both car and passengers, a home call service, replacement vehicle, hotel accommodation and vehicle storage if required. Please note, Citroën Assistance only applies to incidents covered by the new vehicle warranty, and excludes non-vehicle faults, such as running out of fuel, misfuelling, loss of keys, lock-ins, road traffic accidents and punctures/wheel changes. For more details, please contact Citroën at https://www.citroen.co.uk/owner-services/emergency-assistance

- * 2 years' unlimited warranty. No-fee customer option of 1 year's Dealer provided warranty, only on cars sourced from Citroën UK Limited. Note: Dealer provided warranty is limited to 60 000 miles for cars
- ** Against all internal to external perforation to bodywork or underbody.

CITROËN MAINTENANCE

From roadside assistance to replacing wear and tear parts or regular servicing, with Citroën Maintenance you have total peace of mind. For a one-off fee or low monthly payment, our experienced engineers will take care of your Citroën, whatever happens. To find out more, contact your Citroën Dealer or Citroën Authorised Repairer.

CITROËN SERVICING

Available up to 1 year from your vehicle's registration date, but before its first chargeable service, a Citroën Servicing Package enables you to pay in advance for your vehicle's servicing needs for 3 years/35,000 miles. For further information, please contact your Citroën Dealer.

CITROËN MOT TEST

Once your vehicle is three years old, it requires an annual MOT Test. This is a legal requirement to check that it meets road safety and environmental standards. Our nationwide network of Citroën Authorised Repairers know your Citroën best, so if your vehicle's MOT Test is due, why not contact your local Citroën dealer? You can be confident that your vehicle will be looked after by one of our expert trained Citroën Technicians, nominated by DVSA as accredited MOT Testers. Plus, whilst your vehicle is with us, we'll carry out a free manufacturer diagnostic test, check for any new technical updates and carry them out for free - that's the advantage of getting your test done by the people who really know your Citroën.

Insurance groups (1-50) are an indication only, please consult your insurance company for further details.

CO $_2$ figures, P11D values, BIK% and MRRP pricing shown above are for a standard vehicle without any additional optional equipment. CO $_2$ figures are used to calculate Vehicle Excise Duty (VED) for the first registration of the vehicle and BIK%. The addition of optional extras could increase the certified CO $_2$ emission output. This in turn may affect the amount of VED payable upon registration, and, for company car drivers, the amount of Benefit in Kind (BIK) tax payable.

For further information on CO_2 and pricing for vehicles with optional equipment, please visit https://www.citroen.co.uk/configurator.html

+ Figures shown are for comparison purposes and should only be compared to the fuel consumption and CO₂ values of other cars tested to the same technical standard. The fuel consumption achieved, and CO₂ produced, in real world conditions will depend upon a number of factors including, but not limited to: the accessories fitted (pre and post registration); variations in weather; driving styles and vehicle load. The WLTP (Worldwide Harmonised Light Vehicles Test Procedure) is used to measure fuel consumption and CO_2 figures.

* 'On the Road' MRRP includes registration plates and delivery to dealer (including VAT), 12 months' Vehicle Excise Duty and new vehicle registration fee of £55. Excludes fuel and insurance.

All information and prices correct at time of publication, but are subject to change at any time without prior notice (which may occur as a result of, but not limited to, any changes in legislation and/or any changes by the Government). Please see our Prices and Specifications brochures or contact your local Citroen dealer for the most up-to-date prices and specification details for all models.
